Professional Profile

Information Technology student at North-West University with a strong career focus on networking, infrastructure, and network security. Developing practical knowledge across network design, routing and switching, virtualization, network monitoring, and infrastructure technologies.

Education

Bachelor of Science in Information Technology
North-West University – Vanderbijlpark Campus
Expected Graduation: May 2027

Planned Certification

MikroTik Certified Network Associate (MTCNA)
Planned after completion of current university studies.

Career Interests

Network Engineering
Network Infrastructure
Network Security

Technical Skills

Networking & Infrastructure: Network Design, VLANs, Routing & Switching, Subnetting, OSPF, BGP, RSTP, DHCP, DNS, Wireless Networking

Networking & Monitoring: Cisco Packet Tracer, MikroTik/Winbox, pfSense, PRTG Network Monitor, Kentik, Splynx

Virtualization & Systems: Proxmox VE, VirtualBox, VMware, Linux, Docker

Programming & Web: C#, C++, Python, Java, SQL, JavaScript, React, Node.js/Express

Databases & Tools: Oracle, Microsoft SQL Server, SQLite, MongoDB, GitHub, VS Code

Projects

Enterprise Hybrid Homelab | MikroTik, pfSense, Proxmox VE, PRTG

Architected an enterprise-inspired multi-VLAN homelab with network segmentation, firewalling, virtualized Linux services, local DNS, network storage, and proactive infrastructure monitoring.

Enterprise Office Network Simulation | Cisco Packet Tracer

Designed a hierarchical enterprise network with VLANs, redundant core switches using RSTP failover, dedicated DNS infrastructure, multiple routers, ISP connectivity, wireless access points, and edge switching.

Lerato Orphanage Management System | C#, WinForms, SQL Server

Developed a desktop management system featuring user authentication, role-based access, relational database integration, CRUD functionality, and reporting.

Additional Academic Projects | C++, Python, Java, Oracle

Developed applications involving weather data, statistical analysis, database management, and foundational object-oriented programming.

Professional Experience

Network Engineering Shadowing Experience – Telecommunication Company | One Week

- Shadowed a Core Network Engineer at Telecommunication company to learn about telecommunications infrastructure and engineering environments.
- Gained practical operational exposure that strengthened my career interest in networking and infrastructure.
